

Your advantages

- Premium liquid LPG system, using patented LPG pump.
- Available since 1995.
- Reduce your fuel costs up to 50%.
- Save the environment with lower CO₂ emissions.
- State of the art technology using liquid autogas injection.
- No power loss.
- Robust.
- Maintenance free.
- Not sensitive for autogas mix or external factors such as ambient temperature, humidity or altitude.
- No changes in the cooling system of the vehicle needed.
- More than 700 dealers worldwide.
- System Warranty of 5 years with maximum of 100,000 km.
- Complies with EC 67 –R01 regulations, R115, R10.
- Dedicated systems available for over 800 different models meeting EC R115 regulation.
- Based on high performance positive displacement pump (PTC).
- Unique multivalve design with patented 80% fill-stop-technology.
- Offering EOBD functionality.

Liquid Propane Injection

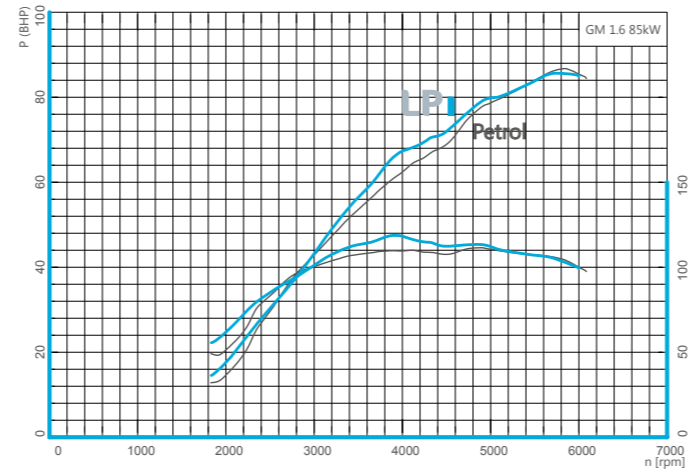

Best choice in liquid phase autogas system technology!

- Vialle is worldwide innovative technology leader in the area of autogas systems. Its **LPi** system was the first liquid phase system available in the world. A unique and innovative, patented system that injects autogas in liquid phase. Suitable for modern port injected petrol fuel systems. Installed by various car manufacturers worldwide. **LPi** has been installed in over 2,500,000 vehicles worldwide.
- The **LPi** system can be installed on almost all vehicles with petrol engines, including modern lean burn, turbo and Euro5 engines. The **LPi** technology injects the autogas in liquid phase in the manifold of the engine, which allows for precise injection of the autogas. The cooling effect of the expanding liquid autogas in the manifold results in improved filling of the cylinder and an improved power of the engine. As the **LPi** system is controlled by the original engine ECU, all engine characteristics are kept and therefore the vehicle is less polluting for the environment. The performance of the **LPi** system is not influenced by external factors or influences, such as ambient temperature, autogas composition or humidity. This results in an ultimate reliable system.

Range calculated with avg fuel prices dated March 2017

Graph engine power **LPi** / petrol

Vialle **LPi** offers the optimal mix of power and fuel consumption

Hartge BMW H1-LPi	Fuel cost of a full tank	
	Petrol	Autogas
Vmax (km/h)	290	305
Power (HP)	280	298
	€ 60,-	€ 25,-
